DETAILED ACTION

Response to Arguments

1. Applicant's arguments, see 2-7, filed 6/8/2009, with respect to claims 1-2, 4-7 have been fully considered and are persuasive. The rejection of claims 1-2, 4-7 has been withdrawn.

EXAMINER'S AMENDMENT

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Dennis Hubbs on 9/8/2009.

The application has been amended as follows:

Please cancel the claims 8-12.

Reasons for Allowance

3. Claims 1-2, 4-7 are allowed.
4. The following is an examiner's statement of reasons for allowance:

The closest prior art of record (US 2001/0055707 A1) do not anticipate or suggest or render obvious the invention as recited in the independent claim.

While US '707 teaches a fuel cell system comprising a purge gas supply source, neither US '707 nor the remaining prior art of record would reasonably lead one of

ordinary skill in the art to arrive at the invention as currently claimed. For example, the prior art of record does not reasonably teach or suggest of the claimed fuel cell system comprising a first passage connecting the fuel battery to a purge gas supply source; a second passage connecting the fuel battery to an exterior through an ejector; a first solenoid valve installed in the first passage; a second solenoid valve installed in the second passage; a current sensor producing an output indicative of current generated by the fuel battery; and an electronic control unit that opens the first and second solenoid valves to open the first and second passages to supply the purge gas to the fuel battery through the first passage such that residue in the fuel battery is purged to the exterior through the second passage by the purge gas, at a time interval determined from the output of the current sensor, further including a hydrogen sensor installed in the second passage at a position located downstream of the ejector and producing an output indicating that hydrogen gas flows into the second passage at a position located downstream of the ejector. And there is nothing taught by the prior art of record to reasonably arrive at the claimed configuration.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to MUHAMMAD SIDDIQUEE whose telephone number is

(571) 270-3719. The examiner can normally be reached on Monday-Thursday, 7:30 am to 4:00 pm EST.
